

## Overview : RCATS Smart Lithium Glow Driver

Never again will you have to show up to the flying field with a dead glow plug driver. The RCATS Smart Lithium Glow Driver is the first commercially available glow plug driver utilizing lithium battery technology to provide a means for power. This unique unit allows for unrivaled longevity between charges. Depending on your usage, the glow driver is estimated to last over a year before needing recharging! The Smart Lithium Glow Driver also includes many powerful features that makes starting your engine easy and just as enjoyable as your flying.

## Features

- Two Lithium-ion cells to achieve 4400mAH of capacity
- Long battery life (over 1 year with normal use)
- Initial slow inrush of current lengthens glow plug life
- High current capability! Capable of delivering up to 5A to the glow plug
- Adjusts current automatically to keep the plug lit
- Strong enough to keep a glow plug lit under water!
- Built in Lithium-ion charger. Simply plug in the included wall adapter and the unit charges in several hours.
- Built in safety circuitry prevents over/under charge
- Auto shut-off, times out after 45 seconds of non-use
- Pause/Reset button
- Attractive, translucent blue case keeps electronics sealed and away from fuel and oils
- Easy to read LED bar graph
- Durable glow plug clip included
